Open. Opened with a click, as if you're the only one who can do it. And the mechanism is made for a one-handed grip. It's genius.

It's a simple, elegant, and functional design. I've printed it and it works perfectly. The mechanism is a joy to use and the one-handed grip is a real game-changer. I've recommended it to all my friends and they love it too. It's a great addition to any bar or kitchen. I've also received several compliments from people who have seen it.
