Short description:

3D printed lamp

Description:

<p>As a specialist, le FabShop knows how to recognize a good 3D printer. We were impressed by the quality of the Zortrax M200 and its high quality ABS. Le FabShop's creative director, Samuel N. Bernier, designed a lamp that would use its entire build volume (an impressive 20x20x18.5cm). The lampshade he imagined has an aesthetic inspired by folded paper, the layers created by the M200 being so smooth they actually feel like a completely flat surface. The Zuzanna lamp can be used as a suspension or a table light. All you need to add is an e27 socket with cable and an LED lightbulb to complete it. </p><p>
