

MILITECH VINDICATOR 9mm

**Dear Patron, welcome to the assembly instruction for the Militech Vindicator 9mm pistol from Cyberpunk 2077. This build is going to challenge your patience.**

**There are some very tricky assembly steps and you may fail at one or the other point. Don't give up! May the PATINECE be with you.**

**You will need rubber bands for this build!**

# **IMPORTANT!**

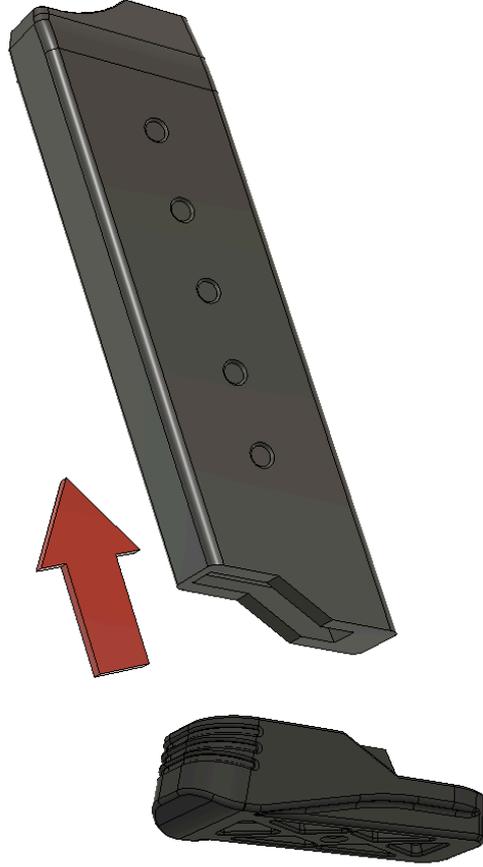

*Take your time when removing supports. A clean surface is mandatory for the functions of this build. Go through the instructions and read all details before you glue something together. Check if the magazine fits into the gun before you glue both shells. If the mag does not fit, use some sanding paper and sand the magazine down a bit. This applies to all other moving parts too.*

**27**

**Take the rubber band (or rubber bands) and pull it through the hole of the rubber band stop. Take your time.**

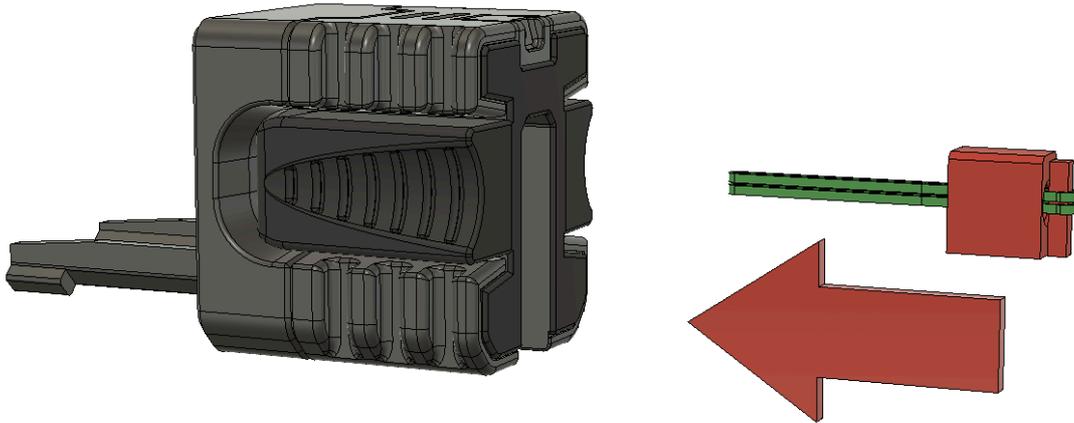

**28**

MILITECH VINDICATOR 9mm

29

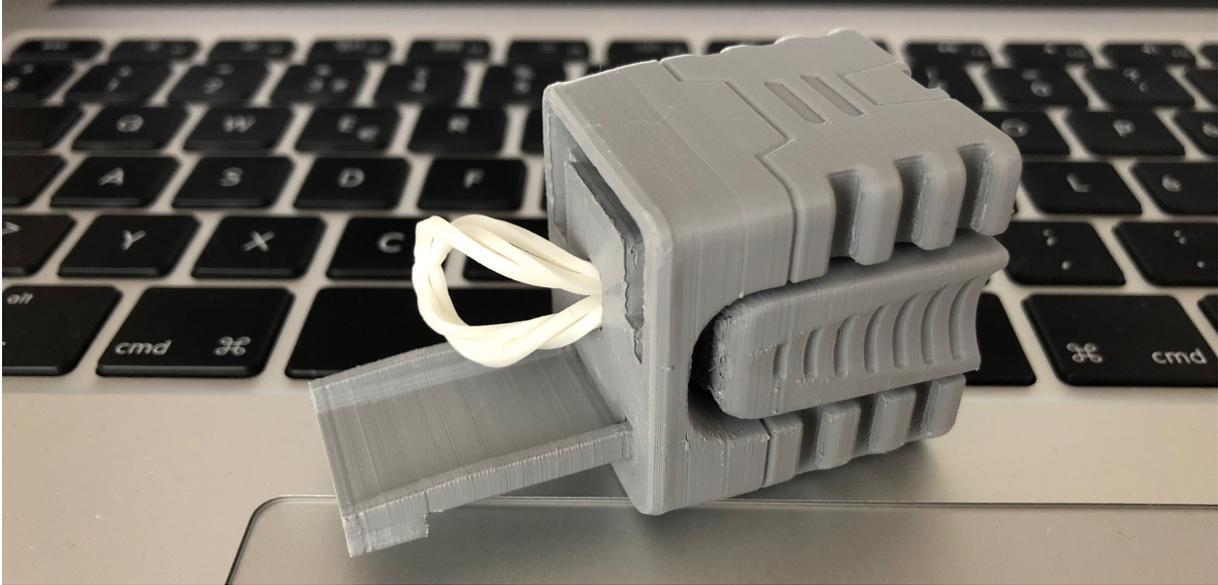

Put the rubber band into the slide.

30

31

**Take the slide with the installed rubber band and extend the rubber band. This will help for better navigation later when attaching the rubber band to the main body.**

32

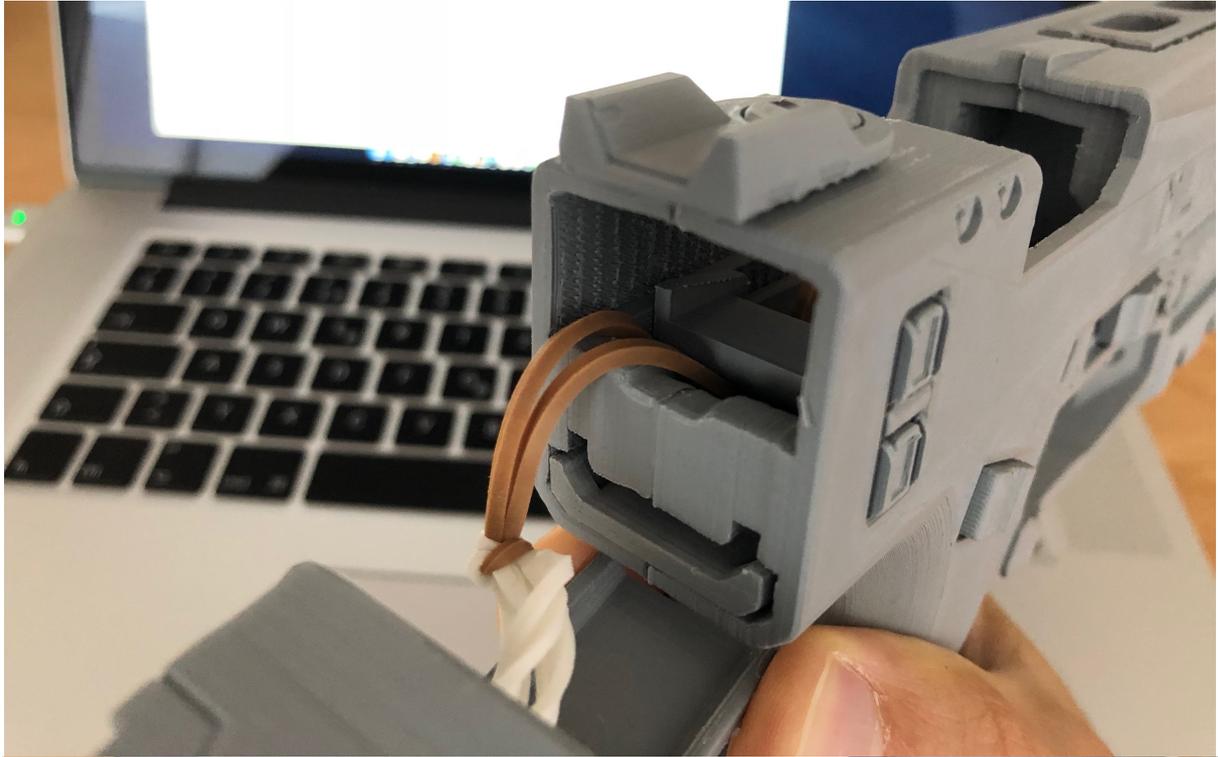

33

MILITECH VINDICATOR 9mm

**Insert the rubber band into the back of the gun.  
Make sure to navigate underneath the trigger  
mechanism!**

MILITECH VINDICATOR 9mm

**34**

**Next put in the upper slide into the frame and push it all to the stop. If it already locks, pull the trigger and you will be able to push it all the way in.**

**Your assembly should look like this now**

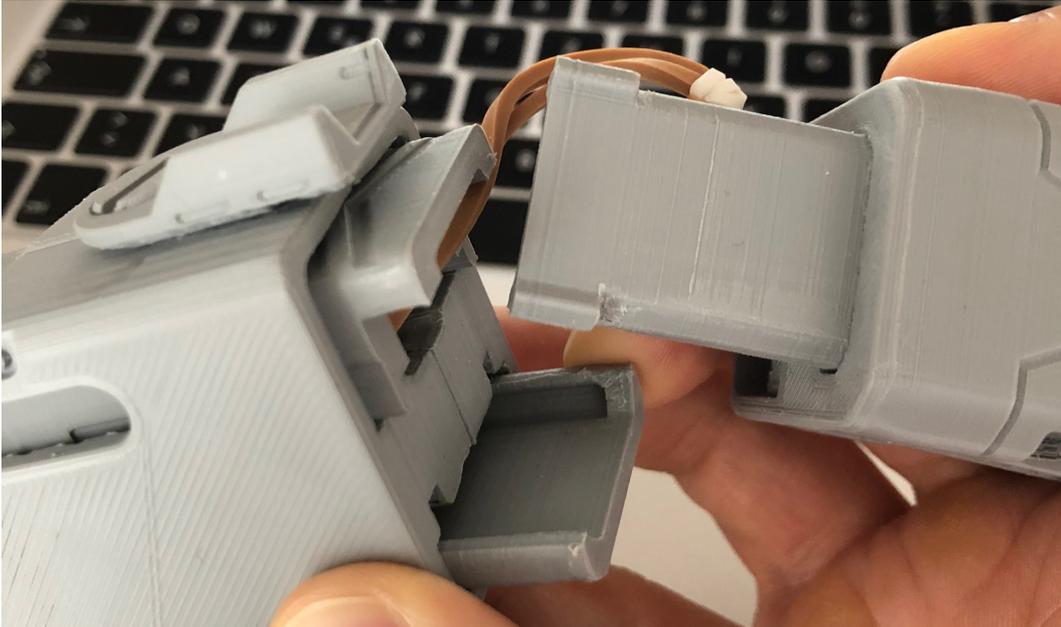

MILITECH VINDICATOR 9mm

**35**

**Next clip the loose part of the slide to the body.  
This is tricky! You need patience and be very careful.  
Pull the lower slide out and hold it like this.**

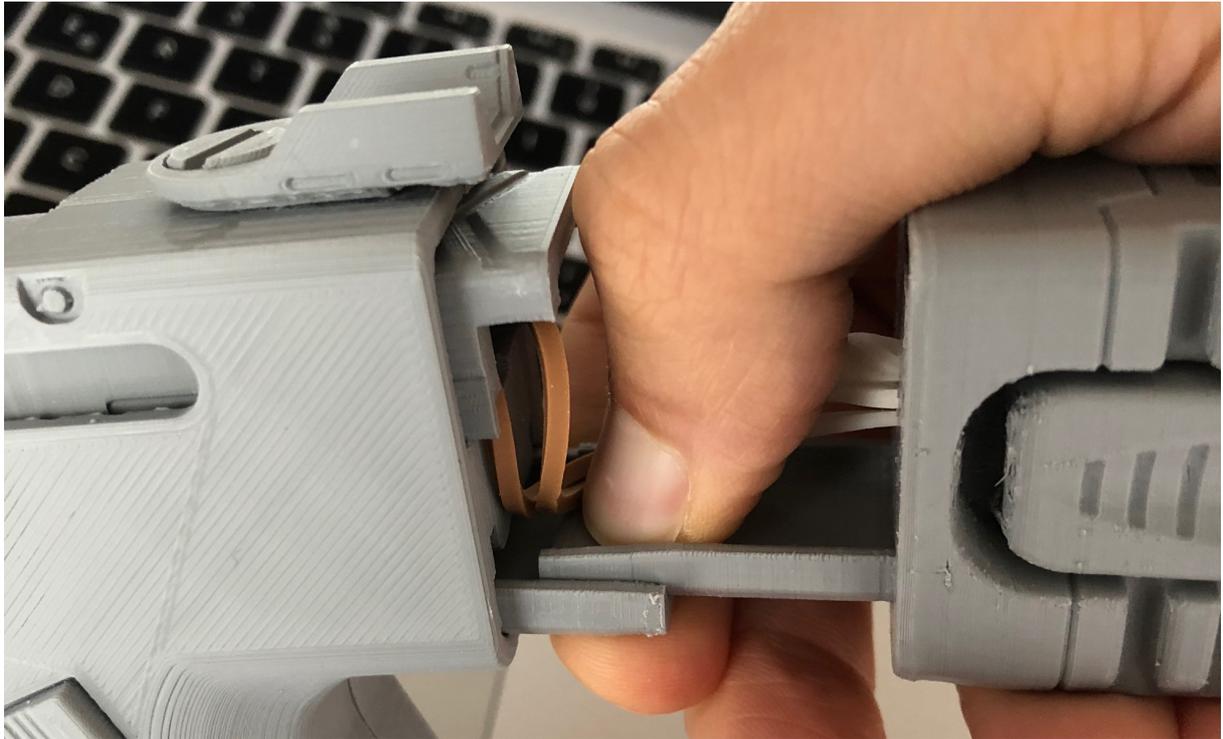

**Attach the loose slide to the lower slide by carefully  
clicking it into the rails.**

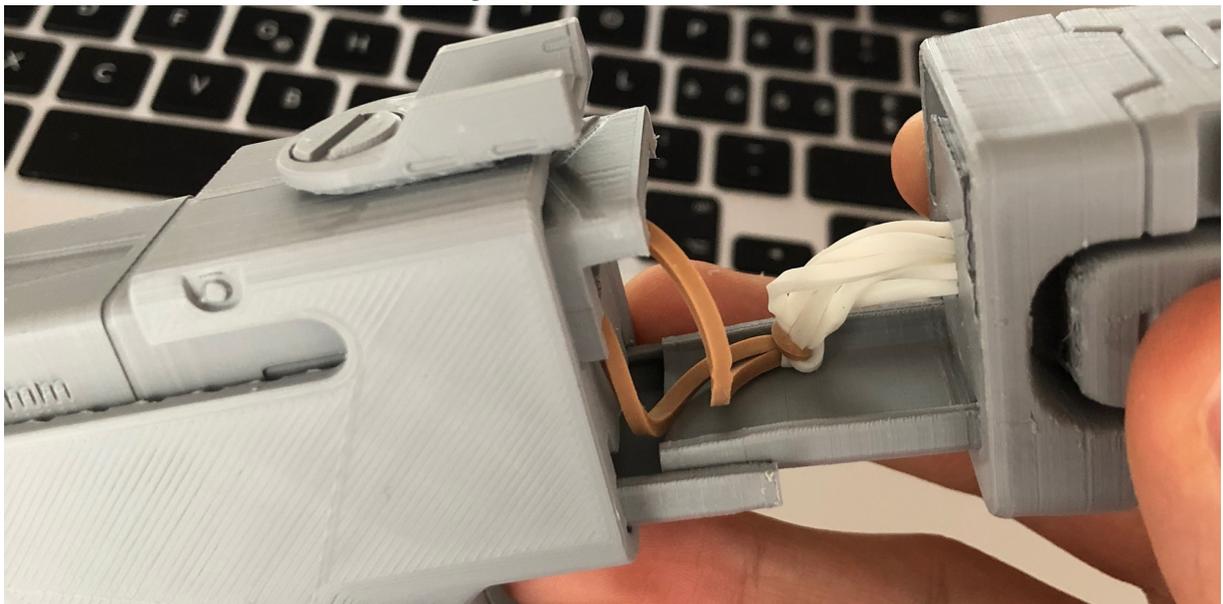

MILITECH VINDICATOR 9mm

**\*CLICK**

**Your assembly should look like this now**

MILITECH VINDICATOR 9mm

**36**

**Pull back the top slide and glue it into the back slide.**

**Leave the slide in this position until the glue dries perfectly.**

MILITECH VINDICATOR 9mm

**37**

**Pull out the extended rubber band and attach it to the frame. PATIENCE is your friend.**

**The rubber band needs to attach right HERE!**

MILITECH VINDICATOR 9mm

**Cut off the rubber band extension. Your trigger should be functional now. Pull the slide back until it locks into place and release it with the trigger.**

**38**

**Glue all buttons and the aiming sight to the body (red components).**
