## Short description:

Ecological vision of a city model of an intersection in Munich.

## Description:

The focus is on ways to improve air quality. This includes facade greening with ivy, infrastructure for e-mobility and car sharing, advertising pillars with algae filters and so called city trees overgrown with moss. This model and other lesson-related examples can be found on the website of the Erasmus + project make in class: <https://www.makeinclass.eu> or the website of the Gymnasium Neubiberg <https://www.gymnasium-neubiberg.de>

If you can, please use the online documentation found at <http://www.youmagine.com/designs/city-model-munich-isartor> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
