Short description:

a simple christmas tree for pulling over a LED candle.

Description:

DO NOT USE REAL CANDLES WITH REAL FLAMES!!! It's for pulling over an LED powered tealight candle. The inner cone acts as a diffuser for an even distribution of the light. But you can also print it in vase mode for a different, brighter but more centric light effect. Play with different infill for various shade effects. Mine are printed with no infill and only 2 perimeter.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/christmas-tree-for-led-candle> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
