Short description:

floating light

Description:

It floats on normal cooking oil. The four canals provide the wick with oil in a way that it is not supplied from below, but from the side. In this way, the oil can be used up better. - You can use any kind of container, vase, mug, bathtub... - Fill it with three parts of water and one part of cooking oil. - Put a wick (or a cotton cord) in the centre of the floating light. - Put it on the oil and wait a minute. - Light the wick and enjoy...

If you can, please use the online documentation found at <http://www.youmagine.com/designs/floating-christmas-light> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
