Short description:

Airbus A220-100 - Modern Jet Airplane - 1:144

Description:

This is the first model I designed, it is less detailed and has fewer features than my other models (cults3d.com/en/users/CLERX/creations) but is still very accurate and easy to print. If you like this model please consider having a look at my other models or supporting me with a donation. Model features: - Windows, flaps, ailerons, elevators, fan blades and the rudder are all modelled. - Completely snap-fit, no glue required. - Universal stand mount shared between all my models. - Length: 25 cm (9,8"), width: 24,5 cm (9,8") Some information about this aircraft: The Airbus A220 (also known as the Bombardier C Series) represents the fusion of performance and technology, allowing airlines to connect distant points on continents or sectors that were previously unprofitable or impossible. With broad seats, plenty of overhead storage space and large windows, it's a single-aisle aircraft that feels like a wide-body jet. The A220's advanced aerodynamics combined with specifically-designed Pratt & Whitney PurePower PW1500G geared turbofan engines contribute to an aircraft that delivers 20% lower fuel burn per seat than previous generation aircraft, half the noise footprint, and decreased emissions, making it a true community-minded jetliner.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/airbus-a220-100-modern-jet-airplane-1-144> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
