Short description:

Three Candles in Fourth of July Attire

Description:

<https://www.youtube.com/watch?v=xM-oZDBRcOM> "Three Candles" in Fourth of July attire. Runs a few days on a charge using three salvaged tea lamp LEDs and flame lenses, one magnet, one reed switch, one 500mah LiPo battery and six 3D printed parts (five unique). Tilt it rearward and it lights, tilt it forward and it extinguishes. We are using these as table centerpieces for our annual Fourth of July gathering. And if you celebrate the Fourth of July, we wish you a safe holiday! Designed using Autodesk Fusion 360 and Meshmixer 3.5.474, sliced using Cura 4.1 and printed in Ultimaker PLA on an Ultimaker 2+ Extended and an Ultimaker 3 Extended.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/three-candles> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
