Short description:

A tealight holder with a reaction-diffusion pattern.

Description:

Meandering sigils inscribe a lore of inexorable beauty. This tealight holder features a pattern generated from a reaction-diffusion simulation using the Gray-Scott model. A subtle overlay of small-scale noise gives the surface a grainy texture. Two versions are provided: a regular model with a thin wall and a model meant to be printed in vase mode. The latter version has a much shorter printing time, but the overall effect of the texture is less prominent.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/alluvial-crush-tealight-holder-reaction-diffusion-spirals> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
