Short description:

A dodecahedron lampshade with a star pattern.

Description:

Inside is the holiday spirit, and fills the room with a myriad dazzling stars! Stars of various sizes and orientations are randomly scattered on a pentagon, making countless combinations. Create a unique pattern each time you put together this lampshade - everything needed can be printed: no glue, no emptying out the screw drawer. There are two versions of the dodecahedron side: one with star-shaped holes all the way through the pentagon, and another where the holes stop halfway through. Use a LED tealight or another small LED light like an IKEA Ledberg.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/christmas-vault-dodecahedron-lampshade> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
