Short description:

Christmas Tree Light Topper

Description:

Another cover for the Christmas tree light. One is a hollow design @0.35mm thickness. You will probably need a brim or raft. The others are solid, so print with 2 shells, no infill. You will have to drill a hole in the bottom or print with no initial layers (which is a bad idea IMO). Edit: Probably need scaling up by 15% (ish). You may get an error depending upon slicer. Its the slicer. No need for supports if you have a decent printer, Merry Christmas and enjoy !

If you can, please use the online documentation found at <http://www.youmagine.com/designs/christmas-tree-light-topper> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
